

SUBJECT: HEFA Project ANCAP Group, Uruguay.

To whom it may concern,

We are pleased to inform that ANCAP Group, through its subsidiary company Alcoholes del Uruguay S.A (ALUR), will launch a call for companies interested in being part of the development of a Renewable Diesel and bioSAF Production Project (HEFA technological pathway).

The attached presentation details the basis features of the project, which is in an open stage for proposals and ideas that could even modify its scale in the following modules of the value chain: feedstock origination, crushing and pre-treatment.

The selection process will consist of the following stages:

- Stage 1: Communication and Dissemination.
- Stage 2: Call for Expression of Interest and Qualification of Companies.
- Stage 3: Call for Application and Selection of one or more developers, partners, strategic allies or key suppliers, for the whole Project or any of its modules.

Once completed stage 2, we will run formal interchanges with the qualified in order to fix Terms of Reference and conditions of stage 3.

The communication and dissemination stage begins with the sending of this mail.

In the first fortnight of next September 2024, the call for Expression of Interest will be formally launched.

Please acknowledge the reception of the present email to hefa@alur.com.uy and answer including the following information:
